Profile

AI Integration & Automation Specialist with hands-on experience using Claude Code and other LLM-assisted development tools. Proven ability to build full-stack SaaS MVPs, internal dashboards, and automated workflows using n8n, Make, Zapier, APIs, webhooks, and JSON. Strong interest in prompt-driven development, AI automation, and systems integration. Works independently, meets tight deadlines, and communicates clearly in written English.

Skills

- AI-Assisted Development: Claude Code, GPT Engineer, prompt engineering, iterative code generation
- Automation & Integration: n8n, Make, Zapier, webhooks, REST APIs, JSON, CRM/ATS integration
- Front-end & Full-stack: HTML, CSS, JavaScript, jQuery, AJAX, responsive design
- CMS & E-commerce: WordPress, Shopify, SEO, schema markup, analytics
- Other: SaaS MVP prototyping, dashboard building, data sync scripts, code review, agile processes

Work History

AI Integration Specialist 2025-05 - 2026-04

- Leveraged Claude Code to prototype and ship functional web systems, reducing development time by 40% through prompt-driven code generation and iterative refinement.
- Built and deployed automation workflows using n8n, Make, and Zapier – integrating APIs, webhooks, and JSON payloads to connect CRMs, ATS, and data systems with minimal manual intervention.
- Developed full-stack SaaS MVPs and internal dashboards by combining Claude Code's generative capabilities with custom HTML, CSS, JavaScript, and jQuery.
- Converted design mockups into production-ready websites using prompt-driven development – writing clear English specifications for Claude Code to generate accurate HTML, AJAX, and JSON components.
- Implemented SEO best practices and analytics tracking; used Claude Code to automate meta tag generation and schema markup, increasing organic traffic.
- Designed and maintained automation scripts for CRM/internal tool data synchronization using webhooks and REST APIs, reducing manual data entry by 70%+.
- Worked independently as sole AI automation lead – researching, testing, and integrating emerging LLM tools (Claude Code, GPT Engineer) to solve business problems.

- Documented all prompt strategies, integration patterns, and system architectures in clear written English for team handoffs and repeatable AI workflows.

Senior WordPress & Shopify Developer (Contract), 2024-11 - 2025-03

- Gathered requirements from clients and translated them into technical specifications, enhancing project alignment.
- Debugged complex software issues, leading to a more stable product release.
- Coordinated with cross-functional teams to integrate new features, improving delivery and functionality.
- Supervised programmers, designers, and technicians – assigned tasks and monitored performance.
- Continuously updated skills through training, workshops, and self-study, staying current with AI and automation tools.

Senior WordPress & Shopify Developer, 2019-06 - 2024-10

- Conducted code reviews, ensuring high-quality standards across all development efforts.
- Quickly adapted to new technologies and programming languages, contributing to team productivity.
- Reduced development time by creating reusable code libraries for future projects.
- Updated old codebases to modern development standards, improving functionality.
- Designed customized solutions for proposals to potential customers.

UX/UI Designer & Developer, 2017-10 - 2019-04

- Conducted competitive analysis of UX/UI trends, integrating best practices to enhance user engagement.
- Reduced project timelines by utilizing agile design processes, increasing productivity without sacrificing quality.
- Advocated for UX/UI best practices in meetings and presentations, influencing design strategies.
- Improved website conversion rates through strategic placement of call-to-action elements.
- Designed engaging, consistent visuals across devices, optimizing user experience.
